Bibliothèques

BibliLanceurES.h

```
void choixVarEnv();  
void choixFichier(int n, char* chemin);  
void historique(int typeTimeSaver, char* nomFichierPBM1, char* posAvion);  
void triBulle(int tab[], int tailleTab);  
void statsFreqMois();  
void statsTypeTS();  
void statsImgStatique();  
void statistique();
```

BibliExiaSaver2.h

```
void analyse(char portion, char* conteneurChemin);  
void heurePBM();
```

BibliES3.h

```
void initTableau(int tab[23][60]);  
void moveDroite(int x, int y, int tab[23][60]);  
void moveGauche(int x, int y, int tab[23][60]);  
void moveHaut(int x, int y, int tab[23][60]);  
void moveBas(int x, int y, int tab[23][60]);  
void printTabPBM(int tab[23][60]);
```
